

Craig Musgrave

FabLab

Craig Musgrave grew up in northern Indiana as the child of educators.

Mr. Musgrave attended Ball State University and later Indiana University, where he graduated with a Bachelor of Arts degree in education. While attending university, he apprenticed with a guitar maker in central Indiana and worked in a repair and restoration shop.

After graduation, Mr. Musgrave worked for Marshall Electric, a small company making ignition systems for the automotive industry. He designed and built custom manufacturing machinery. Mr. Musgrave spent half of the time in Indiana building machines and the other half in Shenzhen, China, installing and setting up machines in the factory there.

Mr. Musgrave and his children moved to the Oklahoma City area to be closer to his brother and family. He began a new chapter of his life in education. After adding twins to his family, he took a break from teaching to be a stay-at-home dad and opened a guitar repair and restoration shop from his home.
